

*From Screen to Green learning*

Being a part of an ERASMUS+ KA210-SCH  
Project № 2025-1-BG01-KA210-SCH-000358291

Co-funded by  
the European Union

**REDUCE, REUSE,  
RECYCLE**

**PROJECT: MASCOT**

**SZKOŁA PODSTAWOWA IM. W. KRÓLOWEJ JADWIGI  
W HERMANOWEJ  
POLAND**

In our preschool, caring for the planet is a true adventure! As part of the international Erasmus+ project "From Screen to Green Learning," our little explorers delved into the secrets of waste separation and its crucial role in environmental protection. The children learned that waste separation is not just a duty but a real benefit for forests, seas, and animals.

# HOW WE START?

Before we started our work, we looked at the mascot project of our colleagues from Bulgaria.

# WHAT WE NEED?

plastic bottles

glue, tape

scissors, plastic eyes

plasticine

pompoms

**WE WERE VERY INVOLVED IN CREATING OUR MASCOTS:  
ECO-FRIENDLY PEOPLE  
AND  
OCTOPUSES.**

# OUR MASCOTS

While creating these small works of art, our students intensively honed their manual dexterity, developing their inventiveness, and developing their boundless creativity. It's amazing how, thanks to a child's imagination, truly unique pieces can be created from discarded plastic!

THANK  
YOU
